<table>
<thead>
<tr>
<th>Criterion Number</th>
<th>Criterion Description</th>
<th>Level (1 or 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The burn center hospital is currently accredited by The Joint Commission or equivalent.</td>
<td>1</td>
</tr>
<tr>
<td>2.</td>
<td>The burn center has an identifiable medical and administrative commitment to the care of the patient with burns.</td>
<td>1</td>
</tr>
<tr>
<td>3.</td>
<td>The burn center maintains an organizational chart of personnel within the burn center and the hospital.</td>
<td>2</td>
</tr>
<tr>
<td>4.</td>
<td>The burn center hospital maintains a specialized unit dedicated to acute burn care.</td>
<td>1</td>
</tr>
<tr>
<td>5.</td>
<td>The burn center has designated ICU capable beds.</td>
<td>1</td>
</tr>
<tr>
<td>6.</td>
<td>The burn center maintains an appropriate policy and procedure manual that is reviewed regularly with appropriate documentation by the burn center director and the nurse manager.</td>
<td>1</td>
</tr>
<tr>
<td>7.</td>
<td>Multi-disciplinary patient care conferences are held and documented at least weekly.</td>
<td>1</td>
</tr>
<tr>
<td>8.</td>
<td>Renal dialysis, radiological services, including computed tomography scanning, and clinical laboratory services are available 24 hours per day.</td>
<td>2</td>
</tr>
<tr>
<td>9.</td>
<td>The burn center has timely access to operating rooms available 24 hours a day.</td>
<td>1</td>
</tr>
<tr>
<td>10.</td>
<td>A dedicated OR team with burn experience is available for the burn operating theatre.</td>
<td>2</td>
</tr>
<tr>
<td>11.</td>
<td>The burn center hospital's policies and procedures regarding the use of allograft tissues are in compliance with all federal, state, and The Joint Commission (or equivalent) requirements, and, when feasible and appropriate, with standards of the American Association of Tissue Banks (or equivalent).</td>
<td>1</td>
</tr>
<tr>
<td>12.</td>
<td>The Burn Center has liaisons with a designated trauma center to coordinate care of patients with multi-trauma.</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td><strong>BURN UNIT VOLUME</strong></td>
<td></td>
</tr>
<tr>
<td>13.</td>
<td>The burn center must have a sufficient volume of acute burn admissions on an ongoing basis to demonstrate to the site reviewers and to the Verification Review Committee that the burn center has a quality burn care program; centers with less than 100 admissions per year should anticipate that site reviewers will audit patient charts for demonstration of quality of care.</td>
<td>1</td>
</tr>
<tr>
<td>14.</td>
<td>80% of admissions to the center must constitute acute burn injuries; for centers with numbers less than 100 admissions per year (including observation status patients) the center can consider that 5 new patient outpatients equates to 1 inpatient.</td>
<td>1</td>
</tr>
<tr>
<td>15.</td>
<td>Centers caring for pediatric patients must demonstrate facilities, protocols and personnel specific to the care of critically ill pediatric patients; centers with less than 100 admissions per year should anticipate that site reviewers will audit charts for demonstration of quality of care.</td>
<td>1</td>
</tr>
<tr>
<td>16.</td>
<td>The burn center maintains an average daily census of 3 or more patients with acute burns.</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td><strong>Verification Criteria – EFFECTIVE JANUARY 1, 2015</strong></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>-----------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td>17</td>
<td>No more than 5% of all patients with a primary diagnosis of a burn injury are admitted to another service per year (e.g. geriatrics, pediatrics, medicine)</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>PRE-HOSPITAL CARE</strong></td>
<td></td>
</tr>
<tr>
<td>18</td>
<td>The burn center has written guidelines for the triage, treatment, and transfer of burned patients from other facilities.</td>
<td></td>
</tr>
<tr>
<td>19</td>
<td>The burn center maintains access to an EMS system for the transport of patients with burns from referral sources within the service area.</td>
<td></td>
</tr>
<tr>
<td>20</td>
<td>The burn center offers input into the performance improvement of pre-hospital care of burn patients.</td>
<td></td>
</tr>
<tr>
<td>21</td>
<td>The emergency department has written protocols mutually developed with the burn service for the care of acutely burned patients.</td>
<td></td>
</tr>
<tr>
<td>22</td>
<td>There are formal transfer agreements with outlying hospitals in the catchment area for transfer of burn patients.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>DISASTER PLANNING</strong></td>
<td></td>
</tr>
<tr>
<td>23</td>
<td>The Burn Center interfaces with regional trauma centers to coordinate care of patients with multiple injuries and to develop regional educational programs, disaster planning and advocacy efforts.</td>
<td></td>
</tr>
<tr>
<td>24</td>
<td>The burn center has a written Mass casualty Disaster plan for the triage and treatment of those patients burned in a Mass casualty incident occurring within its service area.</td>
<td></td>
</tr>
<tr>
<td>25</td>
<td>The Mass casualty disaster plan is reviewed and updated as needed and on an annual basis by EMS representatives and the burn center director.</td>
<td></td>
</tr>
<tr>
<td>26</td>
<td>There are current (within the past 3 years) written memoranda of understanding with other burn centers regarding secondary triage.</td>
<td></td>
</tr>
<tr>
<td>27</td>
<td>The Burn center must maintain accurate and up to date contact information for burn surgeons and managers on the ABA website.</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>BURN CENTER DIRECTOR</strong></td>
<td></td>
</tr>
<tr>
<td>28</td>
<td>The burn center director is a licensed surgeon (MD or DO) with board certification by American Board of Surgery or American Board of Plastic Surgery (or equivalent for international burn centers in which case a surgeon must co-manage the Center).</td>
<td></td>
</tr>
<tr>
<td>29</td>
<td>The burn center director has completed a one-year fellowship in burn treatment and/or has experience in the care of patients with acute burn injuries for two or more years during the previous five years.</td>
<td></td>
</tr>
</tbody>
</table>
30. The burn center director has current ABLS (or equivalent) training.

31. The Burn Center Director is responsible for the following:
   a) Direction of burn center administrative functions.
   b) Creation of policies and procedures within the burn center specifying all aspects of care for burned patients.
   c) Ensuring that all burn center providers conform to the burn center's locally established policies and procedures.
   d) Coordination with regional EMS authorities regarding triage and transport of burn patients.
   e) Approval of privileges for physicians participating in the burn service based on medical staff credentialing process.
   f) Development and active participation in internal and external continuing medical education programs in the care and prevention of burn injuries.
   g) Direction and active participation in the burn center Quality & Process Improvement Programs.
   h) Communications on a regular basis with referring physicians regarding patients who have been transferred.

32. In the event that the Burn Center Director is not available an accessible burn center staff surgeon is designated for administrative or clinical decisions.

33. The Burn Center Director regularly participates in regional, national or international burn meetings.

34. The Burn Center Director has directed the total burn care of 50 or more acutely burned patients annually over a three-year period.

35. The Burn Center Director demonstrates ongoing involvement in burn-related research, community education, continuing medical education, prevention efforts and local regional or national burn advocacy.

36. Attending staff burn surgeons are licensed surgeons with board certification by American Board of Surgery, American Board of Plastic Surgery or equivalent based on review by Verification Committee.

37. Attending staff burn surgeons have demonstrated expertise in burn treatment as evidenced by completion of a one-year fellowship in burn treatment or by two or more years of mentored experience in the management of patients with acute burn injuries.

38. Each attending staff surgeon must participate in continuing medical education in burn treatment.

39. Attending staff surgeons have current ABLS (or equivalent) training.

40. Each attending staff surgeon has participated, including primary decision-making, in the care of 35 or more acutely burned patients annually.
41. The burn center maintains an on-call schedule for residents, qualified healthcare professionals and attending staff surgeons for continuous responsibility of burn patients.

COVERING PHYSICIANS, QUALITY HEALTH CARE PROFESSIONALS AND CONSULTANTS

42. All physicians (and physician extenders) who are routinely responsible for the care of burn patients conform to Burn Center criteria documenting appropriate training, patient care experience, continuing medical education, and commitment to the care of the burned patient. 1

43. All physicians (and physician extenders) participating in the burn service are credentialed by the hospital medical staff credentialing process and are approved by the burn center director. 1

44. Assigned burn center medical staff are promptly available on a 24-hour basis. 1

45. Specialty consultants (e.g. nephrology, cardiology, neurosurgery etc.) are available in a timely manner determined by the acuity of the diagnosis. 2

46. A dedicated anesthesia team with burn experience is available for the burn operating theatre. 2

NURSING

47. There is a registered Nurse Manager with a baccalaureate or higher degree who is administratively responsible for the burn center. 1

48. The nurse manager has at least two or more years of experience in acute burn care. 2

49. The nurse manager has six months or more managerial experience. 2

50. An organizational chart outlines the relationship between the nurse manager and other members of the burn team. 2

51. A patient care system is employed to determine daily nurse staffing needs for patients in the burn center. 2

52. There is a competency-based burn nursing educational program for all nurses assigned to the burn center. 1

THERAPY

53. A comprehensive rehabilitation program is designed for burned patients within 24 hours of admission. 1

54. Physical and occupational therapists in the burn center are appropriately licensed in their specific disciplines. 1

55. Therapy staffing is based upon burn center inpatient and outpatient activity with at least one designated full-time-equivalent burn physical therapist and one occupational therapist but more depending on center volume (1 FTE / 6 patients). 1

56. Inpatients with an active rehabilitation program in place should receive a minimum of daily therapy services. 1

57. There is a designated therapist qualified in burn care available 7 days per week for care of burn patients. 1
AMERICAN BURN ASSOCIATION – BURN CENTER VERIFICATION REVIEW PROGRAM
Verification Criteria - EFFECTIVE JANUARY 1, 2015

58. Burn therapists receive orientation and regular supervision from individuals with at least one year of experience in the treatment of burn patients.

59. There is a competency-based burn therapy orientation program for all therapists assigned to the burn center.

60. Therapists assigned to the burn unit must demonstrate burn therapy competence after initial orientation and at a minimum of once every two years.

ANCILLARY SERVICES

61. Social service consultation is available to the burn service 7 days per week and on an as needed basis in off-hours.

62. A dietitian with adequate critical care and burn experience is available on a daily basis for consultation.

63. A pharmacist with adequate critical care and burn experience is available on a 24-hour basis.

64. Respiratory therapists are available for the assessment and management of patients on the burn service on a continuous basis.

65. A child life/recreational therapist is available for children cared for in the unit (for Pediatric Burn Centers).

AMBULATORY CARE

66. The Burn Center has appropriate Outpatient facilities to care for new outpatients and discharged patients.

67. The outpatient facility ideally should be an integral and physical part of the Burn Center and should ideally be contiguous with/adjacent to the in-patient unit.

68. If the outpatient services are at a site remote to the burn center there must by adequate facilities for wound care including showering.

69. Outpatient examination room must be of adequate size to allow for dressing changes, wound cleansing, splinting, casting and reapplication of wound dressings.

70. The outpatient facility must be able to provide for appropriate pain management during wound care.

71. For continuity of care, staffing of the outpatient area should be by experienced burn team members approved by the burn center director and nurse manager.

72. The outpatient staff participates in weekly multi-disciplinary burn conferences and the burn center PI program.

AFTERCARE

73. The Burn Center follows >75% of all patients who transition to the outpatient setting.

74. The burn center provides the following transition of care services:
AMERICAN BURN ASSOCIATION – BURN CENTER VERIFICATION REVIEW PROGRAM
Verification Criteria – EFFECTIVE JANUARY 1, 2015

a) Coordinated transition of care to the outpatient status. 1
b) Appropriate follow-up after hospital discharge. 1
c) Brief psychological screening / intervention. 1
d) Evaluation of patient developmental status. 2
e) Access to appropriate rehabilitation. 2
f) Access to reconstructive surgery. 2
g) Access to peer support groups (such as but not exclusively a Phoenix Society SOAR program). 2
h) Access to social service, pharmacist and dietary consultations as needed. 2
i) Access to vocational counseling. 2

75. No more than 5% of hospital admissions are transferred to another acute care facility. 1

REHABILITATION

76. Physiatrist consultation is available. 2
77. The Burn center coordinates with local and/or regional rehabilitation centers for inpatient rehabilitation. 1
78. The Burn center coordinates with local and/or regional outpatient facilities for ongoing outpatient therapy needs of patients needing rehabilitation after discharge. 1

QUALITY IMPROVEMENT

79. The burn center director is responsible for the risk adjusted performance improvement program. 1
80. A multidisciplinary burn center committee oversees the performance improvement program, meets at least quarterly and is integrated into the hospital QI structure. 1
81. Sufficient QI documentation is available to verify problems, identify opportunities for improvement, resolve the problem and provide loop-closure. 1
82. The morbidity and mortality conferences:
   a) Are held at least monthly. 1
   b) Include specialist peer staff members other than those practicing in the burn center. 1
   c) Include discussion of all life-threatening complications and deaths with classification according to level of concern and preventability. 1
   d) Include documentation of loop closure. 1
   e) Are attended by practitioners (hospitalists, intensivists, qualified healthcare professionals etc.) involved in the direct care of the burn patients who participate in at least 50% of the morbidity and mortality conferences. 1
AMERICAN BURN ASSOCIATION – BURN CENTER VERIFICATION REVIEW PROGRAM
Verification Criteria - EFFECTIVE JANUARY 1, 2015

83. Sentinel events are discussed in a timely manner at multi-disciplinary intensive reviews during which time a non-involved peer leads a discussion with all involved parties and areas for improvement and loop closure are identified.

84. The burn service conducts audits of their benchmarked outcomes data (using available resources such as NBR, UHC, NHSN, or CMS) at least quarterly.

85. The burn center develops ongoing PI projects to create a culture of safety and promote value-based programs.

86. The burn center has policies for infection control with regular monitoring for hospital-acquired infections, multi-drug resistant organisms and compliance.

87. The burn center participates in the ABA's National Burn Repository and submits data every year.

88. The burn center database includes all patients who are admitted to the burn center hospital for burn care.

EDUCATION

89. Burn staff (including nursing, therapy, social work and medical staff) are provided with a minimum of one regional, national or international burn-related continuing education opportunity annually.

90. A burn center orientation and ongoing continuing education program documents staff competencies specific to age appropriate care and treatment of burn patients, including critical care, wound care, and rehabilitation.

91. The burn center offers regional education related to emergency and inpatient burn care such as that included the ABA Advanced Burn Life Support course.

92. For centers that have residents involved in care of the burn patients an orientation program is provided for new residents.

93. The burn center staff participates regularly in public burn outreach programs.

THE BURN CENTER MUST DOCUMENT ACTIVE PARTICIPATION IN AT LEAST ONE OF THE FOLLOWING ACTIVITIES:

PREVENTION

94. Burn center staff is involved in local, regional national or international prevention outreach efforts.
AMERICAN BURN ASSOCIATION – BURN CENTER VERIFICATION REVIEW PROGRAM
Verification Criteria -EFFECTIVE JANUARY 1, 2015

ADVOCACY

95. Burn Center staff under the leadership of the burn center director, work locally, regionally or nationally to advocate for burn related health care issues. 2

RESEARCH

96. The burn center multi-disciplinary staff is involved in research (including basic science, clinical, industry-sponsored, QI, multi-center) and presents posters or oral presentations at hospital based, regional national or international meetings. 2
