

BURN CENTER VERIFICATION

Verification of burn centers is a joint program of the American Burn Association (ABA) and the American College of Surgeons (ACS). It is a rigorous review program designed to verify a burn center's resources that are required for the provision of optimal care to burn patients from the time of injury through rehabilitation. Elements of this voluntary program include an application, pre-review questionnaire, an in-depth on-site review by members of the ABA Verification Committee, as well as senior members of the ABA. A written report of the site visit team is reviewed by the ABA Verification Committee and by the Committee on Trauma of the ACS.

Burn Center verification provides a true mark of distinction for a burn center. It is an indicator to government, third-party payers, patients and their families, and accreditation organizations that the center provides high quality patient care and meets the demanding standards for organizational structure, personnel qualifications, facilities resources and medical care services set out in the ABA chapter on Guidelines for the Operation of Burn Centers in the ACS publication on Resources For Optimal Care Of The Injured Patient 1999.

The ABA is pleased to provide the following list of burn centers verified at the time of publication of this resource book. Updates to this list are placed on the ABA web site at www.ameriburn.org as they are received.

ARIZONA

Phoenix

Arizona Burn Center at Maricopa Medical Center
Burn Center Verified—expires 7/30/06

CALIFORNIA

Orange

UCI Regional Burn Center
